

Patrick Esmonde, MSE Bio

Patrick Esmonde, MSE, serves as the CEO and Co-Founder of Vestibular First. An experienced technologist and business leader, he brings fresh perspectives and solutions to the challenges of an established market for vestibular diagnostics and rehabilitation. Building on his strong background in information systems and technology management, Patrick – working in collaboration with his wife and Co-Founder Helena Esmonde – was able to quickly prototype and refine countless iterations of the Insight Infrared Video Goggles and then lead the scale-up of the company’s manufacturing processes. Receiving a patent for their innovative modular goggles design in April 2020 and FDA clearance in November 2020, Vestibular First’s Insight Infrared Video Goggles are a testimony to Patrick’s exceptional design vision and tireless determination.

Patrick has a Bachelor’s degree in Business and Management Information Systems from Drexel University and a Master’s in Technology Management from the University of Pennsylvania, a joint degree from The Wharton School and the School of Engineering and Applied Science (SEAS). He has also served in several Information Systems leadership roles in Higher Education for the past 10 years.

Patrick’s other interests are at the intersection of technology and education, serving as an Adjunct Assistant Professor at Villanova University and teaching the IT Strategy course for the MBA program. Currently on sabbatical for the launch of the goggles, Patrick will return to the classroom once Vestibular First is at full operational speed. In his free time, Patrick also serves as a member of a local Potters Guild, creating and selling pottery as well as assisting with their accounting and treasury.
